SUMMARY

Emerging software engineer highly skilled in designing, implementing, and installing software applications to complete developing an app or product. Keen to develop web applications in both frontend and backend or develop full-stack applications. Coding and unit testing. Conducting code analysis to provide efficient code.

KEY PROJECTS

Sydney Motor Service Centre (Group Project)

Frontend Git-hub repository: https://github.com/keithc07/full_stack_client

Backend Git-hub repository: https://github.com/keithc07/full_stack_server

Website: <https://sydney-motor-service-centre.netlify.app/>

- A full-stack app that automates the bookings for a car service business. ReactJS handles frontend and Ruby on Rails handles backend
- Features include JWT authentication, authorization with administrator account, sign-up/in/out account, booking system, calendar, job details, and responsive design

Gamehub (Marketplace Application)

Git-hub repository: <https://github.com/keithc07/Gamehub-marketplace>

Website: <https://gamehub-marketplace.herokuapp.com/listings>

- A Ruby on Rails application where users can create a post to sell second-hand games
- Features include search/sort panel, authorization, authentication, create account, edit/delete account, and responsive design
